About Course

Shree Academy provides the best Node.js course in Rajkot! This course is designed for anyone who wants to learn how to build scalable and high-performance websites or web apps using Node.js. Node.js is an open-source, cross-platform JavaScript runtime environment that allows developers to build server-side web apps using JavaScript. It has become increasingly popular in recent years because of its ability to handle large-scale web applications and its lightweight nature. In this course, you will learn the fundamentals of Node.js, including modules, event-driven programming, asynchronous programming, and the Node.js runtime environment. You will also learn how to use Node.js to build web applications, create RESTful APIs, and work with databases like MongoDB.

About Shree Academy

Shree Academy was found in 2012 with the mission of providing best quality Computer Education and International Language Coaching to all classes of people at a very reasonable fee structure. Thousands of students have already got trained professionally and made their career successfully in the past.
