3D ANIMATION

6 Months
180 Hours Approx.

Join the Best 3D Animation Training Institute to Learn from Experts. Enrol in our 3D Animation Course & Classes for a Successful Career. Also Get Online Verifiable Certificate and Job Placement Assistance

Course Content

- ▶ Introduction to 3D Animation
- ▶ 3D Modeling
- ▶ Texturing and Shading
- ▶ Lighting and Rendering
- ▶ Rigging and Character Animation
- ▶ Motion Graphics and Effects
- ▶ Advanced Animation Techniques
- ▶ Advanced Rendering and Compositing
- ▶ Industry Practices and Workflows
- ▶ Final Project and Showcase

About Course

The aim of this 3D animation program is to make the students self-reliant and equip them with the artistic approach, technical knowledge, mastering tools as well as the concepts of animation so they can make a mark in the global world of animation. 2D animations are superficial whereas 3D animations possess some depth. Our programme starts with art and design, They learn basic construction in drawing using Pencil & paper which is their canvas to produce frames that define a sequence which is then moved at a different speed that creates an illusion of movement. Then we introduce various softwares & techniques to master the skills of animation. Apart from drawing and character designing, 3D animators deal with modeling, rendering, texture and lighting.
