About Course

SketchUp is most widely used 3D Modeling computer software designed for architects, interior designer, mechanical, and civil engineer, as well as graphics artists for film and video game design. It is a ideal software for both students and professionals, who are interested in 3D modeling. Our Instructor will teach you from the fundamentals till advanced techniques of SketchUp. In this course, you will learn about navigation tools, so that you can orbit, pan and zoom around your model, then create a simple house with a few drawing and modification tools too in early classes. After getting the concept of navigation tool your work accelerate towards creating a more detailed house with some drawing and the follow-me and offset tools.

About Shree Academy

Shree Academy was found in 2012 with the mission of providing best quality Computer Education and International Language Coaching to all classes of people at a very reasonable fee structure. Thousands of students have already got trained professionally and made their career successfully in the past.
