About Course

CorelDRAW is a feature-packed vector graphics suite which includes a large collection of fonts and clip art. A full range of editing tools allows the user to produce illustrations of just about any description via the ability to edit any shape or character with ease and precision, generate text both in paragraph or headline style, fit text to curves and objects and add special effects. This course is designed to enable new users to start using CorelDRAWs extensive editing tools to work with text and precision drawing features quickly and easily. At the end of this course, delegates will be able to: 1) Use tools and palettes effectively and understand the terminology used. 2) Create and edit images and text. 3) Apply a range of special effects to images
