- ▶ Motion Tracking and 3D Integration
- ▶ Typography and Kinetic Typography
- ▶ Audio and Sound Editing
- ▶ Expressions and Automation
- ▶ Project Work and Portfolio Development

## About Course

Adobe After Effects is a digital visual effects, motion graphics and compositing software application for creating video compositions, animations and special effects. After Effects is perfectly capable of producing high-quality compositions for television programs, commercials and even feature films. After Effects can be used to create, composite, and stylize 2D footage layers in 3D space. It serves a different role depending on the user's needs. After Effects is an incredible software used to apply effects after the footage has been roughly edited to give it more appealing feel. Video editors use After Effects for title design and special effects in their videos. After Effects is widely used mainly for adding more effects and life to your composition and animations.
